git / GitHub version control	Beginner	NetBeans IDE	Intermediate
Linux Shell Scripts	Novice	Agile / Scrum	Novice
Amazon Alexa Skills	Novice	Java FX	Novice

PROJECTS

Sneaker Collection Web Page

Fall 2015

Class project at Williamson High School and Mansfield University

We made several web pages in class when I took Web Design in High School and when I started at Mansfield University I took a similar class that allowed me to add more to my past web page and I continued to keep it updated. It was a shoe collection web page with the names of each sneaker followed with a photo. I use the web page still to keep track of all of the sneakers I have. I used notepad++ to create this web page and wrote the code in HTML.

Creating an Amazon Alexa Skill

Fall 2017

Class project at Mansfield University

Created an Alexa skill that would control LED lights plugged into an Arduino board. Can be used for main lighting in the State Farm Lab at Mansfield University. Still perfecting it as we need to order one more piece of hardware to make it fully functional.

AWARDS, ACTIVITIES, and HONORS

- Dean's List
- Computer Science Club
- Master of the Main Frame Contest
- Volunteer Work

EXPERIENCE

Socha Financial Group – Corning, NY

2011 – Present

IT Management Team

I am responsible for computer technology and regular maintenance. I am the individual on the IT team that is always in the office. When something goes wrong with an of the machines I am the one to troubleshoot the issue and try to work on it. When we need things done with the server I normally contact Chris which is the head IT manager and we work together on a solution. I do all of the regular updates and mini day to day issues.
